

# WINDOW VISION

## 30/60 DVR SYSTEMS

The 30/60 Window Vision DVR Systems represent the culmination of 12 years experience in the DVR industry. This system is designed to give years of reliable performance.

The Window Vision 30/60 DVR is a professional Digital Video Server meeting the more economical range of applications.

Each DVR has Window vision L1 Interface which is a easy-to-use, scaled-down version of the G5 Interface. L1 offers fewer features but the same ease of use and dependability.

Window Vision Remote (included) provides secure live and recorded video from the host server to a remote site. The Remote is capable of up to 16 simultaneous Multi-Host connections.

- 30 and 60 Total Frames Per Second
- Up to 16 Video Channels available
- Up to one Terabyte of Video Storage
- Window Vision L1 Interface
- One year Warranty
- Free Software Upgrades
- Mid-Tower Case
- Free Ground Shipping within USA
- High-end Hardware platform
- Many Features Upgradeable
- Proprietary Continuous Recording
- Burn video archives to internal DVD
- Dynamic IP support to remote
- Ability to operate through firewalls
- Software and hardware Watchdog
- And More...
