

WINDOW VISION NVR SYSTEMS

The Window Vision NVR Systems represent the culmination of 12 years experience in the DVR/NVR industry. This system is designed to give years of reliable performance as evidenced by its unprecedented warranty.

The Window Vision NVR server is a professional Digital Video Server meeting the mid to high range of applications. Window Vision provides the scalability needed in today's demanding CCTV market by offering highly scalable solutions.

The Window Vision NVR interface is available in two styles (G5 and G6) with various number of IP connections. Select the NVR software that matches your customers needs.

Window Vision Remote (included) provides secure live and recorded video from the host server to a remote site. The Remote is capable of up to 64 simultaneous Multi-Host connections.

All NVR Systems are built to the same, or higher standards as our DVR systems. These units are designed specifically to run Network (IP) cameras in an security environment.
